## What will you build with Astro?

Explore [Astro starter themes](#) for blogs, portfolios, docs, landing pages, SaaS, marketing, ecommerce sites, and more!

## Take a guided tour

Complete our introductory [Build a Blog Tutorial](#) to learn the basics and create your first Astro site.

## Start a new project

```
# create a new project with npm  
npm create astro@latest
```

Our [installation guide](#) has step-by-step instructions for installing Astro using our CLI wizard, creating a new project from an existing Astro GitHub repository, and for installing Astro manually.

## Learn

[Astro's main features](#)

[Island architecture](#)

[Astro components](#)

[The Astro template syntax](#)

## Extend

[Add integrations like React, and Tailwind](#)

[Create type safe content collections](#)

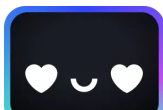

[Enhance navigation with view transitions](#)

[Connect a headless CMS to your project](#)
